Exhibit B

**ORDINANCE NO. 1762-2024**

**AN ORDINANCE AMENDING THE ANGOLA MUNICIPAL CODE,  
TITLE 13 PUBLIC SERVICES, CHAPTER 13.10 SEWER**

BE IT ORDAINED by the Common Council of the City of Angola, Indiana that the Angola Municipal Code, Title 13 Public Services, Chapter 13.10 Sewer is amended by the text of existing provisions in this style type, additions in **this style type**, and deletions ~~this style type~~:

Section 1. 13.10.150 Authority and other jurisdictions is amended to read as follows:

(A) Responsibility of the city.

- (1) Except as otherwise provided herein, the Superintendent shall administer, implement, and enforce the provisions of this chapter. Any powers granted to or duties imposed upon the Superintendent may be delegated by the Superintendent to other city personnel
- (2) The city shall attempt to notify in writing any industrial user whom he/she has cause to believe is subject to a categorical pretreatment standard or requirement, or other applicable requirements promulgated by the EPA under the provisions of Section 204(b) or 405 of the Act, or under the provisions of sections 3001, 3004, or 4004 of the Solid Waste Disposal Act. Failure of the city to so notify industrial users shall not relieve said industrial users from the responsibility of complying with applicable requirements. It is the responsibility of significant industrial user to apply for and receive a permit prior to discharge, whether the industrial user has been identified and formally requested to do so.
- (3) If wastewaters containing any pollutant, including excess flow, or as otherwise defined in this chapter, are discharged or proposed to be discharged to the POTW, the city may take any action necessary to:
  - (a) Prohibit the discharge of such wastewater;
  - (b) Require an industrial user to demonstrate that in-plant facility modifications will reduce or eliminate the discharge of such substances in conformity with this chapter;
  - (c) Require treatment, including storage facilities or flow equalization necessary to reduce or eliminate the potential for a discharge to violate this chapter;
  - (d) Require the industrial user making, causing or allowing the discharge to pay any additional cost or expense incurred by the city for handling, treating, disposing or remediation costs because of wastes discharged to the wastewater treatment system; **and for administering the pretreatment requirements;**
  - (e) Require the industrial user to apply for and obtain a permit;
  - (f) Require timely and factual reports from the industrial user responsible for such discharge; or
  - (g) Take such other action as may be necessary to meet the objectives of

**ORDINANCE NO. 1762-2024**

this chapter.

(B) Additional city authorities. In addition to the overall authority to control the discharge of wastewater to the POTW, the city shall have the following authorities:

- (1) Take enforcement and issue fines and penalties for violations of this chapter, including the failure of an industrial user to apply for a permit.
- (2) Endangerment to health or welfare of the community: The city, through other than a formal notice to the affected industrial user, may immediately and effectively halt or prevent any discharge of pollutants into any natural waterway, surface drainage within the city, any area under jurisdiction of the city, the POTW of the city or any wastewater system tributary thereto, by any means available to them, including physical disconnection from the wastewater system, whenever it reasonably appears that such discharge presents an imminent endangerment to the health or welfare of the community.
- (3) Endangerment to Environment or Treatment Works. The city, after written notice to the discharger may halt or prevent any discharge of pollutants into any natural waterway, surface drainage within the city, any area under jurisdiction of the city, the POTW, wastewater system tributary thereto, by any means available to them, including physical disconnection from the wastewater system, whenever such discharge presents or may present an endangerment to the environment or threatens to interfere with the operation of the POTW.
- (4) The discharges referred to above may be halted or prevented without regard to the compliance of the discharge with other provisions of this Chapter.

(C) Regulation of industrial users from outside jurisdictions.

- (1) In order for the city to effectively implement and enforce pretreatment standards and requirements for all industrial users discharging to the POTW and as required by 40 CFR Section 403.8(f), the city shall enter into intergovernmental agreements (IGA) with contributing jurisdictions. Prior agreements shall be unaffected by these requirements until the city determines that modifications are necessary.
- (2) Prior to entering an IGA, the city shall be provided the following information from the contributing jurisdiction:
  - (a) A description of the quality and volume of wastewater discharged to the POTW by the contributing jurisdiction;
  - (b) An inventory of all sources of indirect discharge located within the contributing jurisdiction that are discharging to the POTW; and
  - (c) Such other information as the city may deem necessary.
- (3) The IGA may contain the following conditions:
  - (a) A requirement for the contributing jurisdiction to adopt a sewer use ordinance or rules which specifically require that all non-domestic users shall be under the jurisdiction of this chapter for the purposes of implementation and enforcement of pretreatment standards and requirements;
  - (b) A requirement for the contributing jurisdiction to submit an updated

## ORDINANCE NO. 1762-2024

- user inventory on at least an annual basis;
- (c) A provision specifying that the city shall be delegated full responsibility for implementation and enforcement of the pretreatment program unless otherwise agreed to and specified in the IGA;
- (d) A requirement for the contributing jurisdiction to provide the city with access to all information that the contributing jurisdiction obtains regarding effluent quantity and quality from non-domestic users;
- (e) Requirements for monitoring the contributing jurisdiction's discharge; and
- (f) A provision specifying remedies available for breach of the terms of the IGA.

Penalty: See AMC 13.10.610.

Section 2. 13.10.160 Prohibited discharges is amended to read as follows:

(A) General prohibitions. An industrial user may not introduce into a POTW any pollutant(s) which cause pass through or interference. These general prohibitions and the specific prohibitions in paragraph (B) of this section apply to each industrial user introducing pollutants into a POTW whether or not the industrial user is subject to other pretreatment standards or requirements.

(B) Specific prohibitions. It shall be unlawful for any industrial user to discharge or deposit or cause or allow to be discharged or deposited into the wastewater treatment system of the City any wastewater which contains the following:

- (1) **Wastewater having a temperature greater than 150 degrees F (65 degrees C) at the point of discharge, or heat** ~~Heat~~ in amounts which will inhibit biological activity in the POTW resulting in interference, but in no case heat in such quantities that the temperature at the POTW treatment plant exceeds 40°C (104°F) unless the approval authority, upon request of the POTW, approves alternate temperature limits.
- (2) Waters or wastes containing free or floating oil and grease, or any discharge containing animal fat or grease by-product in excess of 100 mg/L unless the industrial user has installed treatment as required by the city.
- (3) Pollutants which create a fire or explosion hazard in the POTW. More specifically, no industrial user shall discharge any waste stream with a closed cup flashpoint of less than sixty (60) degrees Celsius (140 degrees Fahrenheit) using the test methods specified in 40 CFR Section 261.21. The Superintendent may require industrial users with the potential to discharge flammable, combustible or explosive substances to install and maintain an approved combustible gas detection meter or explosion hazard meter. No two successive readings on an explosion hazard meter at the point of discharge shall be more than five percent (5%), nor any one reading more than ten percent (10%), of the

## ORDINANCE NO. 1762-2024

- Lower Explosive Limit (LEL) of the meter.
- (4) Pollutants which result in the presence of toxic gases, vapors, or fumes within the POTW in a quantity that may cause acute worker health and safety problems.
  - (5) Garbage that has not been properly ground.
  - (6) Ashes, cinders, sand, mud, straw, shavings, wood, metal, glass, rags, feathers, tar, plastics, paunch manure, butchers' offal or any other solid or viscous substances capable of causing obstruction to the flow in sewers or other interference with the proper operation of the sewerage system or the wastewater treatment plant.
  - (7) Waters or wastes having a pH lower than five (5.0) or having any other corrosive property capable of causing damage or posing hazards to the structures, equipment or personnel of the sewage works.
  - (8) Solid or viscous substances which may cause obstruction in the sewage system or otherwise cause Interference to the POTW.
  - (9) Any radioactive wastes or isotopes of such a half-life or concentration that they do not comply with limits established by the city or other regulations set forth by the Indiana Department of Environmental Management, State of Indiana or that violates any federal standards.
  - (10) Any pollutant, including oxygen demanding pollutants (CBOD, etc.) released in a discharge at a flow rate and/or pollutant concentration which will cause pass through or interference with the POTW.
  - (11) Any waters or wastes containing suspended solids of such character and quantity that unusual provision, attention or expense would be required to handle such materials at the wastewater treatment plant, its pumping stations or other facilities.
  - (12) Stormwater drainage from ground resulting in infiltration and inflow (I & I) through the industrial user's service line(s), surface, roof drains, catch basins, unroofed area drains (e.g. commercial car washing facilities) or any other source unless otherwise approved by the Superintendent. Specifically prohibited is the connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or ground water to a building sewer or building drain which in turn is connected directly or indirectly to the city's wastewater collection system. No person shall connect or discharge water from underground drains, sump pump discharges, natural springs and seeps, water accumulated in excavation or grading or any other water associated with construction activities.
  - (13) A slug discharge as defined in §13.10.020.
  - (14) Petroleum oil, nonbiodegradable cutting oil, or products of mineral oil origin in amounts that will cause interference or pass through.
  - (15) Trucked or hauled pollutants except as authorized by the Superintendent and only at discharge points designated by the Superintendent.
  - (16) Any pollutant directly into a manhole or other opening in the POTW unless

## ORDINANCE NO. 1762-2024

specifically authorized by the city or as otherwise permitted under this chapter. Prohibited is the opening of a manhole or discharging into any opening in violation of this chapter.

- (17) Any substance which will cause the POTW to violate its NPDES permit or the receiving water quality standards.
- (18) Any water or waste which contains grease or oil or any other substances that will solidify or become discernibly viscous at temperatures between thirty-two degrees (32°) Fahrenheit (0° Celsius) and one hundred fifty degrees (150°) Fahrenheit (65.5° Celsius).
- (19) Any wastes containing detergents, surface-active agents, or other substances in concentrations which cause excessive foaming in the POTW or cause or contribute to interference or pass through.
- (20) Any water contaminated as a result of discharge from aboveground and/or underground gasoline, diesel fuels, fuel oil, kerosene, jet fuel tanks, tank accessories, and/or pipelines without applying for and obtaining a permit prior to discharge.
- (21) Any pollutant or wastewater containing pollutants with UV (254 nm) absorbing substances which causes interference with UV disinfection at the treatment plant.

(C) Wastes prohibited by this section shall not be processed or stored in such a manner that they could be discharged to the POTW except as authorized by an industrial user permit and/or this chapter. If the industrial user has a pretreatment facility, all floor drains located in process or materials storage areas must discharge to the industrial user's pretreatment facility or to sumps or tanks that do not have the potential for a discharge to the POTW before connecting with the POTW. The city may require other industrial users to contain or collect wastewater from floor drains to protect the POTW and meet the objectives of this chapter.

(D) Specific Discharge Limitations. It shall be unlawful for any significant industrial user or other permitted non-significant industrial user to discharge, deposit, cause, or allow to be discharged any waste or wastewater which fails to comply with the limitations imposed by this section.

- (1) Dilution is prohibited as a substitute for treatment and shall be a violation of this chapter. Except where expressly authorized to do so by an applicable pretreatment standard or requirement, no industrial user shall ever increase the use of process water, or in any other way attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with a pretreatment standard or requirement. The city may impose mass limitations on industrial users which are using dilution to meet applicable pretreatment standards or requirements or in other cases where the imposition of mass limitations is appropriate.
- (2) No significant industrial user or other permitted non-significant industrial user shall discharge wastewater that exceeds the following limits:

For those industries where molybdenum containing chemicals are not used but have molybdenum in their waste stream as a byproduct of a finishing process and the concentration-based limit is unachievable, the Wastewater Superintendent may impose an industry specific mass-based limit that at no time shall exceed 0.08 lbs./day of molybdenum.

- (3) Categorical Pretreatment Standards found in 40 CFR chapter I, subchapter N, parts 405–471 are hereby incorporated by reference. All industrial users subject to a categorical pretreatment standard shall comply with all requirements of such standard and shall also comply with any limitations contained in this chapter. Where the same pollutant is limited by more than one pretreatment standard, the limitations which are more stringent shall prevail. Compliance with categorical pretreatment standards shall be the timeframe specified in the applicable categorical pretreatment standard.
- (4) The city may establish more stringent pollutant limits, additional site-specific pollutant limits, best management practices, or additional pretreatment requirements when, in the judgment of the city, such limitations are necessary to implement the provisions of this chapter.

Penalty: See AMC 13.10.610.

Section 3. 13.10.220 Exclusion of certain wastes – Prior approval for certain wastes is amended to read as follows:

(A) Exclusion of Certain Wastes. Provision is made for the exclusion of industrial wastes by the Board of Public Works:

- (1) For all industrial wastes;
- (2) For certain industrial wastes which because of their constituents (toxicity, acidity and the like) impair the functioning of the wastewater treatment plant; and
- (3) For temporary exclusion of all or certain industrial wastes when conditions are such that NPDES permit restrictions cannot be met.

(B) Prior Approval for Certain Wastes. Review and acceptance by the Superintendent shall be obtained prior to the discharge into the public sewers by any person of sewage wastes that have:

- (1) A CBOD greater than 200 mg/l;
- (2) A total suspended solids content greater than 250 mg/l; or

**ORDINANCE NO. 1762-2024**

(3) Other contaminants or characteristics which, from their nature or quantity, might be harmful to the structures, processes or operations of the sewage works or to health, whether by themselves or through interaction with other wastes in the public sewers.

**(C) Right to Accept or Refuse Wastes. Nothing in this chapter shall limit the ability of the city to accept or deny any new or increased discharges from any indirect discharger.**

Penalty: See AMC 13.10.610.

This ordinance shall become effective following passage and adoption by the Common Council and approval by the Mayor.
